Title

MATHS TEST

Description

Alice has a mathematics test for which she is underprepared. She has to do at least one question correctly to pass the test. He decides to do a question which needs her to find the smallest prime number which is larger than a given integer N. Your task is to find and return an integer value representing the smallest prime number larger than N.

Input Format:

input1: An integer value N

Output Format:

Return an integer value representing the smallest prime number larger than N.

Sample Input

Sample Output

7

Source Code:

```
def is_prime(num):
    if num <= 1:
        return False
    for i in range(2, int(num**0.5) + 1):
        if num % i == 0:
            return False
    return True
def next_prime(N):
    candidate = N + 1
    while True:
        if is_prime(candidate):
            return candidate
        candidate += 1
# Example usage
N = 6
result = next_prime(N)
print(result) # Output: 7
```
